About

After 15 years with SQL Server, 26 years in IT and in a lot of different companies I started my own company SQLExperted to be able to deliver an overall better experience for my customers.
I work as a freelance SQL Server consultant with my base in Stockholm Sweden, but I help customers all over the world.

I help companies to another level within your SQL Server databases.

- Do you want better Performance, a Stable SQL Server platform or to Think and see new innovative solutions.

• I can help you with an isolated problem or take a larger responsibility to stabilize and performance optimize your whole environment.

• I do in depth performance analyses.

• I can help you with Query and Index performance tuning and optimization.

• Implement monitoring for SQL Server that are both simple and gives deep-dive analysis.

• Set up and implement a framework for best practice setup and installations.

• I help you implement High Availability/Disaster Recovery (HA/DR) solutions.

• I can be involved if you have a discussion with a supplier where you feel that they have done some database design where you see performance issues.

• I can be a partner if you want to start to think in new directions and see new innovative solutions.

• I work with SQL Server On-premises and in Azure.

• I am based in Stockholm Sweden but help customers all over the world.

Skills

- SQL Server 2000 – 2022

- Query and Index performance tuning and optimization

- Troubleshooting

- Monitoring

- Consolidating and virtualization

- Maintenance

- Backup & restore

- Installation and automatization

- AlwaysOn

- Clustering

- Mirroring, Snapshot, Log shipping

- Upgrade of SQL Server

- Implement best practices

- SQL Server Audit

- Performance and Tuning (SQL Server and hardware)

- Worked with large and transaction intense environments

- Azure

Experience – SQL Server

Microsoft - Cloud solution Architect - Data & Artificial Intelligence
January 2024 - Present

SQL Service AB - SQL Server Expert
August 2021 - January 2024
Worked as a consultant and had a long-term assignment at Axfood where there where a quite large SQL Server platform. I did work on all parts of SQL Server, from daily tasks as backup/ restore, troubleshooting, helping other teams.
But the main part has been to stabilizing the whole environment, doing major performance review of the larger systems and finding and optimizing heavy queries, add indexes where need, remove indexes (for one system we were able to remove 2 TB of indexes).
During the last 6 months I were a part of large project where we migrated SQL Server to the cloud.

Betsson Group - SQL Server DBA
September - 2015 - August 2021
We had one of the largest SQL Server implementations in Sweden, a 9 physical node cluster with 100 000 transactions/second at peak hours. Daily duties where performance, troubleshooting, query tuning, deploying of new code, monitoring, find slow queries, missing indexes and performance bottlenecks.
I Also worked with CockroachDB(NewSQL) and Couchbase(NoSQL).

EVRY Sweden - Team Lead and SQL Server DBA Consultant
September 2014 - September 2015
My work was divided, the first part was as Team Lead role where also Service Development of SQL Server for all Swedish customers was included. The other part was as a SQL Server DBA, mainly working with 6 large Swedish customers.

Swedish Pensions Agency - SQL Server DBA
December 2011 - August 2014
Responsible for the SQL Server platform at the Swedish Pensions Agency and worked with everything related to SQL Server. Also developed the technical part of their new data warehouse based on SQL Server and HP Fast Track technology.

Swedbank - SQL Server DBA
August 2008 - November 2011
My first role as a SQL Server DBA where we handled large transact intense databases for Trading, Found and Insurance applications at one of the largest banks in Sweden.

Experience – Technical Roles

Swedbank - System maintenance manager
Aug 2007 - Jul 2008

Swedbank - Microsoft Technician
Feb 2002 - Jul 2007

Strömberg Distribution - IT Technician
Jan 1998 - Jan 2002
